

TelePilot SaaS Platform — Commands Reference

Complete Administrative & User Command Cheat Sheet | Powered by Telethon & Aiogram 3

■ SaaS Admin Commands (Exclusive to Admin IDs)

Command / Syntax	Description & Function	Example Usage
<code>/admin</code>	Opens the main SaaS dashboard showing total users, active subscribers, and total revenue.	<code>/admin</code>
<code>/grantlifetime <id/user></code>	Grants permanent free access to a user. Automatically caps connected accounts at 5 and terminates any excess accounts beyond 5.	<code>/grantlifetime @username</code> <code>/grantlifetime 1450244824</code>
<code>/revokelifetime <id/user></code>	Revokes lifetime/paid access for a user and restores their previous paid plan if valid.	<code>/revokelifetime @username</code> <code>/cancelsub 1450244824</code>
<code>/getotp <phone></code>	Connects live to Telegram MTProto and fetches recent login OTP codes sent to any connected user account.	<code>/getotp +919876543210</code>
<code>/terminatesessions <phone></code>	Connects via MTProto and terminates/logs out all active sessions on older devices for a connected account.	<code>/terminatesessions +919876543210</code>
<code>/finduser <query></code>	Finds registered user by Telegram ID, username, full name, or connected phone number.	<code>/finduser @iqPain</code> <code>/finduser 9876543210</code>
<code>/subscribers</code>	Lists all active paid and admin-granted subscribers with plan names and expiry dates.	<code>/subscribers</code>
<code>/accounts</code>	Lists all connected Telegram phone numbers across all users with account health status.	<code>/accounts</code>
<code>/broadcast <msg></code>	Sends a global announcement message to all registered bot users.	<code>/broadcast Server maintenance at 2 AM</code>
<code>/syncaccountlimits</code>	Sweeps all active lifetime subscriptions database-wide, enforcing max 5 accounts and terminating excess.	<code>/syncaccountlimits</code>
<code>/ban <id> / unban</code>	Bans or unbans a user from using the bot platform.	<code>/ban 123456789</code>
<code>/testgroupalert</code>	Tests sending a group discovery alert message to your configured private alert group.	<code>/testgroupalert</code>
<code>/cleargroupalerts</code>	Resets discovered groups memory so unjoined group alerts re-fire on the next run.	<code>/cleargroupalerts</code>
<code>/clearallsubs</code>	Wipes all active subscriptions (used for testing subscription gate logic).	<code>/clearallsubs</code>
<code>/id / !getchatid</code>	Utility command to fetch current chat ID (works in private, groups, channels).	<code>/id</code>

■ User Main Menu Buttons & Controls

Menu Button	Description & Action	Key Features / Rules
-------------	----------------------	----------------------

/start	Initializes user profile, displays welcome banner, pricing, and main menu.	Auto-registers user in database.
■ Dashboard	Shows account overview: active plan, connected accounts, schedule state, sent today.	Real-time metrics.
■ Add Account	Interactive MTPROTO sign-in FSM (Phone -> OTP Code -> 2FA Password).	Max 15 accs (Standard) / 5 accs (Lifetime).
■ My Accounts	Lists all connected phone numbers with options to manage, toggle, or remove.	Shows status (ACTIVE, FLOOD_WAIT).
■ Messages	Configure custom message text, message variant rotation (---), and timer interval.	Timer choices: 1 min to 5 hours.
■ Scheduler	Automation control center showing active status and group discovery strategy.	Control main scheduler loop.
■ ■ Start	Launches auto-messaging across all enabled accounts.	Respects exact configured intervals.
■ Pause / ■ Stop	Pauses active group messaging schedule immediately.	Saves configured timers.
■ Status	Displays live execution status, delivery stats, and job execution logs.	Tracks sent vs failed counts.
■ Subscription	Displays active subscription status, expiry date, allowed accounts, and renewal plans.	Razorpay instant payment checkout.
■ Support	Displays official support contact details and updates channel link.	t.me/TelePilotUpdates

■ ■ Built-in Security, Anti-Ban & System Rules

Feature / Safety Rule	Technical Implementation Details
AES-256 Session Encryption	Stored MTPROTO StringSessions are encrypted at rest using Fernet symmetric encryption.
Zero OTP Retention	OTP codes are processed exclusively in transient memory and never saved to database or disk.
Parallel Account Execution	Accounts execute concurrently using asyncio.gather with an asyncio.Semaphore(20) capping RAM at ~400MB.
Anti-Spam Jitter & Delays	Inter-group delay of 0.8s + random jitter (0.2-0.7s) per account prevents Telegram spam flags.
FloodWait Auto-Recovery	Catches FloodWaitError, pauses account automatically, and auto-resumes when rate-limit window expires.
Lifetime Account Cap (5 Accs)	Lifetime accounts are capped at max 5 connected accounts. Excess accounts beyond 5 are auto-terminated.
